

Grading Rubric (score: description)

=====

0: No answer or completely off-topic.

2: Very limited understanding; major misconceptions; no analytics insight.

4: Basic recall but little interpretation; minimal linkage to analytics.

6: Adequate explanation; some correct insight but superficial or partly incorrect.

8: Good, accurate explanation with sound analytics reasoning; minor omissions only.

10: Excellent, nuanced interpretation demonstrating mastery of network-effects & AI-economics concepts, supported by data-driven logic and scholarly language.

notes: Apply the same scale to each question; average for exam total. A score of 7+ is considered a pass at MSc level.
